BHANERO TEXTILE MILLS LIMITED

BHANERO TEXTILE MILLS LIMITED

DIRECTORS' REVIEW

On behalf of the board of directors of Bhanero Textiles Mills Limited, I am pleased to present, the un-audited condensed interim financial statements for First Quarter ended 30th September 2011.

Operating Results

During the first quarter ended 30th September 2011, the company's profit after tax came to PKR 50.417 million as compared to PKR 117.744 million for the quarter ended 30th September 2010.

During the quarter under review the demand of yarn and fabric was suppressed due to substantial decrease in price of raw cotton and international economic recession. The prices of yarn and fabric are also decreased substantially and affected the profitability of company. However, by the Grace of Al-Mighty Allah, yours company maintained the profitability track despite these conditions.

The earning per share (EPS) for the first quarter ended 30th September 2011 is PKR 16.81 (30th September 2010: PKR 39.25).

The company's financial position continues to remain robust reflecting good fundamentals supported by strong capital and revenue reserves. Break up value of shares is PKR 751.38 as at September 30, 2011 (June 30, 2011 PKR 734.58).

Future Outlook

After the drastic decrease in cotton price, cotton market has to be stabilized on new cotton price. The direction of cotton prices will determine the future profitability.

Currently the price of cotton in local market is around PKR 6,000 to 6,300 per maund and in international market is around USD 1.10 to 1.15 per lbs. China and India is expecting a bumper cotton crop as compare to their last year's cotton production. As a result, India may have exportable surplus of cotton bales whereas lower Chinese demand for imports of cotton bales is expected. Based on above the prices of cotton is expected to be lower in subsequent quarter.

The reduction in discount rate by State Bank of Pakistan from 13.5% to 12% is a good step but it is not enough to satisfy the business community. The State Bank of Pakistan should consider a further reduction in discount rate and it should be brought in single digit.

Interrupted power supply has significantly affected production efficiencies and resulted increases in per unit production cost. Besides the load shedding of electricity massive load shedding of gas in Punjab has been observed even in summer season. In the absence of gas supply, we had to operate machineries through power generation based on furnace oil because currently WAPDA is not reliable source of electricity due to interrupted supply of electricity. Generation of power based on furnace oil has resulted in extra fuel and power cost which had to be borne by the company.

In the present scenario the results are likely to be adverse in coming quarters. However the management of the company is doing its best efforts to maintain the profitability margin.

Acknowledgement

Yours directors record with appreciation, the efforts of the company's managers, technicians and workers who have worked vigorously to meet the target. Yours directors also extent their appreciation to the company's banker, buyers and suppliers for the cooperation extended by them.
